PREFACE

The National Catholic Educational Association (NCEA) has been providing leadership and service to Catholic education since 1904. Rooted in the Gospel of Jesus Christ, NCEA is a professional membership organization that assists its members to fulfill their teaching mission of the Church and to lead, learn and proclaim the good news of Catholic school education.

NCEA is the largest private professional association in the world, representing more than 150,000 educators serving nearly 1.7 million students in preschool, elementary and secondary schools.

Since 1970, NCEA has published a statistical report on Catholic elementary and secondary schools in the United States. These annual reports are designed to provide an understanding of this significant sector of American education, to inform the public discussion of educational policy issues and to encourage and improve practice at the school level.

The first part of this report presents data concerning an overview of the historical dimensions of Catholic education and the context of American education in which private schools operate. This is followed by Catholic school enrollment and staffing demographic data that highlight school, student and staffing characteristics and special services provided to students in Catholic schools.

The report is based upon census data gathered by each of the arch/diocesan offices of education in the United States, representing 176 dioceses with Catholic schools. While every diocese is included, the data do not include responses to all of the items by all of the dioceses or by all the schools within each diocese. With the methods in which the data is collected and inconsistencies in how the data is reported year to year, data trend analyses have limitations. Trend analyses are reported where relevant and available.

We wish to thank the diocesan superintendents of schools and their staff for their assistance in collecting and collating the data from their schools. Thank you also to the NCEA Marketing and Communication team for design and production.

Sarah Roberts
Data Analyst

Mission Statement

In service of the Gospel of Jesus Christ, NCEA strengthens Catholic school communities by convening all stakeholders and providing professional development, data, public policy and resources to support faith and intellectual formation.

Vision Statement

NCEA is a trusted partner that empowers all Catholic schools and their communities to flourish spiritually, academically and operationally.

EXECUTIVE SUMMARY

2024-2025 Academic Year

As Catholic schools respond to changing demographics, economic realities and evolving educational needs, this report serves as a vital tool for strategic decision-making, community engagement and enhancing educational offerings to meet the needs of all students. Insights from the 2024-2025 academic year provide a foundation for growth, innovation and a renewed commitment to the mission of Catholic education.

The 2024-2025 *Annual Statistical Report on Schools, Enrollment and Staffing* provides a high-level overview of Catholic education in the United States, highlighting school characteristics, enrollment trends and geographic distribution. This executive summary synthesizes key findings from the report, offering insights into the evolving educational landscape and its implications for stakeholders.

Enrollment Trends

The national PK-12 enrollment stands at 1,683,506, with preschool students comprising 10.1% of the total enrollment. While Catholic school enrollment has declined by 256,068 students (13.2%) since the 2014-2015 school year, recent years indicate a stabilizing trend. From 2023-2024 to 2024-2025, enrollment declined only slightly by 0.6%, suggesting a slowing rate of decline.

Key Data Points:

- National PK-12 enrollment: 1,683,506.
- Preschool enrollment: 10.1% of total.
- Year-over-year change (2023-2024 to 2024-2025): - 0.6%.

Enrollment by Region Trends

The Great Lakes and West/Far West regions account for nearly half of the Catholic school population, indicating strong engagement in these areas. However, since the 2023-2024 school year, the New England, Mideast and West/Far West regions have experienced declines in enrollment, with New England seeing a 2.1% decline. The Great Lakes and Southeast regions have remained stable, and the Plains region has seen an increase of 1.1% in enrollment.

Key Data Points:

- Plains region enrollment increase of 1.1% since 2023-2024 school year.
- The total number of Catholic schools is 5,852.

School Openings, Consolidations and Closures

The report documents 24 new school openings and 63 closures or consolidations over the past school year, reflecting the dynamic and sometimes challenging environment facing Catholic education. Despite the closures, the relatively low number may signal effective adaptation strategies and community support systems that have helped stabilize many schools. Additionally, 39.3% have a waiting list, indicating strong demand and interest in Catholic schools in various locations.

Key Data Points:

- New schools opened: 24.
- Schools closed or consolidated: 63.
- Percentage of schools with a waiting list: 39.3%.

Faculty Retention

Faculty retention rates in Catholic schools are a crucial indicator of institutional stability, educational quality and commitment to the mission. High retention rates suggest a supportive and engaging environment for educators, which directly impacts student outcomes. These data highlight the national efforts by Catholic schools to maintain a stable experienced faculty and staff.

Key Data Points:

- Nationwide retention rates for principals and teachers were 84.0% and 85.7%, respectively, demonstrating a strong commitment to retaining quality educators.
- 70.5% of superintendents returned this year.
- 5,317 first-year teachers started their careers in Catholic education this year.
- 16,358 teachers were new to their school this year.

Support for Students with Disabilities

Catholic schools are increasingly prioritizing the inclusion of students with disabilities, as evidenced by the rise in the percentage of students with diagnosed disabilities, now at 9.1%, up from 7.8% last year. This shift reflects a growing commitment to serving students with atypical learning needs. Data collection for 2024-2025 identifies the specific types of diagnosed disabilities being addressed.

Key Data Points:

- 9.1% of students in Catholic schools have a diagnosed disability, up from 7.8% last year.
- 75.7% of Catholic schools report having students with diagnosed disabilities.
- The most reported disability categories are attention-deficit hyperactivity disorder (ADHD) and specific learning disabilities.

Non-Catholic Students

Non-Catholic student enrollment in Catholic schools has risen to 21.8%, reflecting the evolving landscape of Catholic education. The trend underscores the need for these institutions to adapt and innovate in ways that uphold their Catholic identity while welcoming and forming students of other faiths.

Key Data Points:

- 21.8% of students are non-Catholic.
- 16.5% of faculty are non-Catholic.

Parental Choice

In 2024-2025, 15 states expanded their parental choice programs increasing opportunities for families to choose Catholic schools. These programs are especially impactful in states like Ohio, Florida, Indiana, Oklahoma, Iowa and Arizona, where more than half of the Catholic school students benefit from them.

Key Data Points:

- 15 states expanded their parental choice programs in 2024.
- 18.0% of Catholic school students utilize parental choice programs.

HIGHLIGHTS

Enrollment:

- Total Catholic school student enrollment for the current academic year is 1,683,506. 1,163,827 in elementary/middle schools; 519,679 in secondary schools.

- Student diversity: 34.9% are racial minorities, 15.4% are specifically Hispanic/Latino and 4.5% were reported as unknown in the racial data collection.

- Non-Catholic enrollment is 366,381 which is 21.8% of the total enrollment.

Schools:

- There are 5,852 Catholic schools: 4,683 elementary; 1,169 secondary.

- Twenty-four new schools opened; 63 consolidated or closed.*

- 2,299 schools have a wait list for admission.

- Coeducational schools comprise 98.5% of elementary and 72.9% of secondary schools. At the secondary level, 12.1% of the schools are male and 15.0% are female.

**The reported number of schools closed includes some that consolidated and re-opened as new entities. The total reported opened is 24, which includes newly built as well as the reconfigured entities. The net loss of elementary schools is 48 while the net loss of secondary schools is 5.*

Professional Staff:

- Full-time equivalent professional staff numbered 154,258.3:

94.0%	Laity	(Lay women: 71.0% Lay men: 23.0%)
2.7%:	Religious/Clergy	(Sisters: 1.6%; Brothers: 0.5%; Clergy: 0.6%)
3.3%:	Unknown	

- The student/teacher ratio is 10.9:1.

CATHOLIC SCHOOL EDUCATION IN HISTORICAL PERSPECTIVE

The existence of Catholic schools in the United States can be traced back to French and Spanish settlements that continued into the colonial era of this nation's history. The increased immigration of Catholic populations in the 19th century produced an expansion of Catholic schooling.

In the 1830's, the public, "common" school movement was begun to serve distinct national social and political goals: a common body of knowledge was to be transmitted in a common schoolhouse to decrease political and social conflict and shape the culture of the new nation. However, by the 1840s, public education and the inculcation of religious values were bound together in a concept of non-denominational Christianity.

Catholics began to resist attempts to teach "common Christianity" and were embroiled in conflicts charged with religious, ethnic and class animosities over control of the schools. Ultimately, the Second Baltimore Council directly attacked the Protestantism of the common school, and the Catholic bishops committed the Church to the establishment of a separate school system and required parents to send their children.

While the goal of erecting a school within every parish, mandated by the Third Plenary Council of Baltimore (1884), was never realized, the growth of Catholic education was steady and extraordinary. Before the Civil War, there were approximately 200 Catholic schools in the United States, and that number increased to more than 1,300 within a decade and to 5,000 by the turn of the century.

In the 20th century, constitutional battles were fought over compulsory public education and the liberty to choose alternatives. The Supreme Court legitimized a dual system of education *(Pierce v. Society of Sisters, 1925; Yoder v. Wisconsin, 1972)* with decisions that protected the right of the non-public school to exist and the freedom of parents to choose from among alternatives for their children. As these alternative systems began to reflect upon their service to the common good and examined the fiscal costs in providing such public service, they began to challenge the inequities inherent in denial of funding because of educational choices exercised by parents.

This debate continues today as part of the national conversation about educational reform and the rights of parents to determine the best educational setting for their children. The U.S. Supreme Court ruling in *Zelman v. Simmons-Harris* (2002) that allowed publicly funded vouchers to be used by parents to fund tuition in private and religious schools energized the parental school choice movement. Recent U.S. Supreme Court decisions *(Hosanna Tabor, Trinity Lutheran, Espinoza, Our Lady of Guadalupe School,* and *Carson)* that protect against discrimination based on the free exercise of religion in choosing and administering faith-based schools is encouraging continued efforts to secure public financial support for low-income students to attend Catholic schools.

Presently 32 states and the District of Columbia have a state choice program and several additional states have proposed legislation. Current efforts aimed to secure additional support, such as a federal tax credit for donations to scholarship-granting organizations are being pursued and will need support of the Catholic school community.

Historical Enrollment and Staffing Patterns

Schools and Enrollment History

Exhibit 1 reports the steady growth of Catholic schools from 1920 to the mid-1960s. By 1965, the peak year, there were almost 13,000 schools enrolling 5.2 million students. The next two decades saw a significant diminishment in both the number of schools and their enrollment. In the 1990s, the rate of school closures declined, and total enrollment rose steadily.

In the 2000s, schools in the central cities experienced sharp declines in enrollment due to down-turned economic trends, demographic changes in those areas and sharp increases in tuition rates. This decline impacted elementary schools primarily while secondary enrollment remained relatively stable until 2008 when secondary began a slow decline.

Since the 2014-2015 school year, national enrollment has decreased by 256,068 students, representing a 13.2% decline in total student population. However, enrollment has stabilized with no change observed since 2021-2022, which was the last significant increase. This year, enrollment showed a minor decrease of 0.6% from 2023-2024 to 2024-2025.

EXHIBIT 1: SCHOOLS AND ENROLLMENT HISTORY

	SCHOOLS			ENROLLMENT		
	Elementary	Secondary	Total	Elementary	Secondary	Total
1920	6,551	1,552	8,103	1,796,000	130,000	1,926,000

2010	5,889	1,205	7,094	1,507,618	611,723	2,119,341
2020	4,995	1,188	6,183	1,202,539	535,906	1,738,445
2025	4,683	1,169	5,852	1,163,827	519,679	1,683,506

School Staffing History

During the last quarter of the 20th century, dramatic changes took place in the staffing of Catholic schools. The staffing patterns listed by decades in Exhibit 2 indicate the depth of the change. The data show the shift from an almost entirely religious staff (sisters, brothers, priests, deacons) of 90.1% at mid-century (1950) to 48.4% in the 1970s to a primarily lay staff, now at 94.0% during the current school year. In general, the changes have been attributed to the decline in the number of women and men entering religious orders, the large numbers of religious who left their orders and the change of ministry directions for many congregations from schools to other forms of social and pastoral ministries.

EXHIBIT 2: SCHOOL STAFFING HISTORY

FULL-TIME EQUIVALENT TOTAL STAFF

	RELIGIOUS		LAY		TOTAL
	Number	**%**	**Number**	**%**	
1920	45,563	92.0	3,942	8.0	49,505

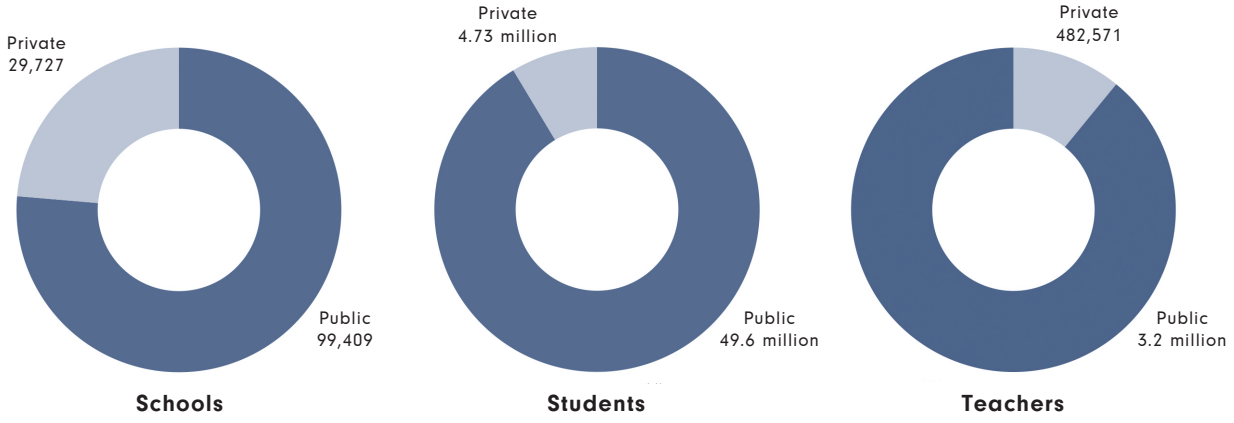
Public/Private School Comparisons

Private schools, defined as those controlled by a non-governmental entity and financed from sources other than public taxation, have been an important component of American education since colonial days. The existence of private schools reflects the fundamental right of parents to exercise freedom of choice in selecting the education they deem most appropriate for their children. Parents select private schools based on several factors, among which are the religious, educational, cultural and social values that are espoused by the institution.

The National Center for Education Statistics (NCES) survey of the private schools during the 2021-2022 school year [latest available data] indicates that there were 29,727 private elementary and secondary schools in the United States. Private schools account for 23.0% of all American schools. Private schools enroll approximately 4.73 million PK - 12 students, representing approximately 8.7% of total elementary and secondary student enrollment in the United States.

EXHIBIT 3: PUBLIC/PRIVATE SCHOOL COMPARISONS



Sources: U.S. Department of Education (2021-2022); Irwin et al. (2024); U.S. Department of Education (2022-2023).

EXHIBIT 4: COMPARISON OF NATIONAL GRADUATION RATES

Data collected from several sources by the U.S. Department of Education's National Center for Education Statistics (NCES) and NCEA provide a portrait of American high school graduates and their post-secondary school experiences.

National Secondary School Graduation Rates

Type of School	Graduation Rate
Catholic	98.6%
Other Religious	96.8%
Non-Sectarian	91.2%
Public Schools	87.0% (actual high school diplomas awarded)

Sources: U.S. Department of Education (2021-2022); Irwin et al. (2024).

EXHIBIT 5: COLLEGE ATTENDANCE COMPARISONS

The percentage of high school graduates who attend four-year colleges:

Type of School	College Attendance Percentage *
Catholic	83.7%
Other Religious	60.0%
Non-Sectarian	56.5%
Public Schools	45.0%

*Data are not available for those attending community colleges, technical schools or enlistment in the military.

Sources: U.S. Department of Education (2021-2022); Irwin et al. (2024).

Private School Universe

Some interesting changes have taken place within private education during the last 60 years. In 1965, Catholic education comprised approximately 68% of the schools and 87% of the enrollment in private education. At the start of the 21st century, religious schools of other denominations have grown rapidly and now comprise 45.4% of the private schools. They surpassed Catholic schools in enrollment, enrolling 41.5% of the students in nonpublic schools; Catholic schools comprise 20.6% of private schools, and enroll 35.2% of the private school population. Non-Sectarian schools comprise 34.0% of the private schools and educate 23.3% of the students.

Private schools are categorized as Catholic, other religious and non-sectarian. Catholic schools are classified as a) parochial, b) diocesan, c) private. The category 'other religious schools' is comprised of three typologies: a) schools identified as conservative Christian, b) schools affiliated with a specific religious national denomination, c) schools not aligned with a national denomination. Non-sectarian schools are a) regular (schools that do not specialize in special, vocational/technical or alternative education; or in having a Montessori or special program emphasis, although they may offer these programs in addition to the regular curriculum), b) special emphasis, c) special education.

EXHIBIT 6: PERCENTAGE DISTRIBUTION OF PRIVATE SCHOOLS BY ENROLLMENT SIZE

School size	<50	50-149	150-299	300-499	500-749	750+
Catholic	5.5	26.0	38.6	18.3	6.8	4.7
Other Religious	43.0	28.7	15.3	6.8	3.7	2.1
Non-Sectarian	56.7	25.8	8.2	4.9	2.2	2.1

CATHOLIC SCHOOL DEMOGRAPHICS: 2024-2025 ACADEMIC YEAR

School Characteristics

Number of Schools

Elementary/Middle	Secondary	Total
4,683	1,169	5,852

Regional Distribution

Data are presented in regional groupings. For this purpose, NCEA groups the schools and dioceses/archdioceses into the following six geographical regions:

New England
Connecticut
Maine
Massachusetts
New Hampshire
Rhode Island
Vermont

Mideast
Delaware
District of Columbia
Maryland
New Jersey
New York
Pennsylvania

Great Lakes
Illinois
Indiana
Michigan
Ohio
Wisconsin

Plains
Iowa
Kansas
Minnesota
Missouri
Nebraska
North Dakota
South Dakota

Southeast
Alabama
Arkansas
Florida
Georgia
Kentucky
Louisiana
Mississippi
North Carolina
South Carolina
Tennessee
Virginia
West Virginia

West/Far West
Alaska
Arizona
California
Colorado
Hawaii
Idaho
Montana
Nevada
New Mexico
Oklahoma
Oregon
Texas
Utah
Washington
Wyoming

Regional Distribution

PK-12 schools are reported as both an elementary and a secondary school. In total, there were 131 reported (P)K-12 schools in 2024-2025.

Exhibit 9 presents the number of schools within each of the regions with the percentages of the distribution indicated by level of the schools and the national composite. The national population trends in the Southeast and West/Far West during the last decade is reflected in the school data. Overall Catholic schools in those areas decreased by 4.6% of the total schools as New England and the Mideast continue to experience school closures with a 21.2% decline in the number of Catholic schools in the last decade.

EXHIBIT 9: REGIONAL DISTRIBUTION OF ELEMENTARY/MIDDLE AND SECONDARY SCHOOLS

	2014-2015		2019-2020		2024-2025	
Elementary/Middle	**Number**	**%**	**Number**	**%**	**Number**	**%**

Location of Schools

Although there has been a significant decrease in the total number of Catholic schools during the last four decades, the church is committed to serve children within the inner cities and urban areas. Schools in these areas remain a significant presence. In the 1983-1984 school year, at their peak, 49.0% were located in urban and inner-city areas. Today 38.8% of the schools are still in those locales despite population losses and great financial difficulties in maintaining them. During that same period of time, suburban schools increased from 25.1% to 40.9% of the total.

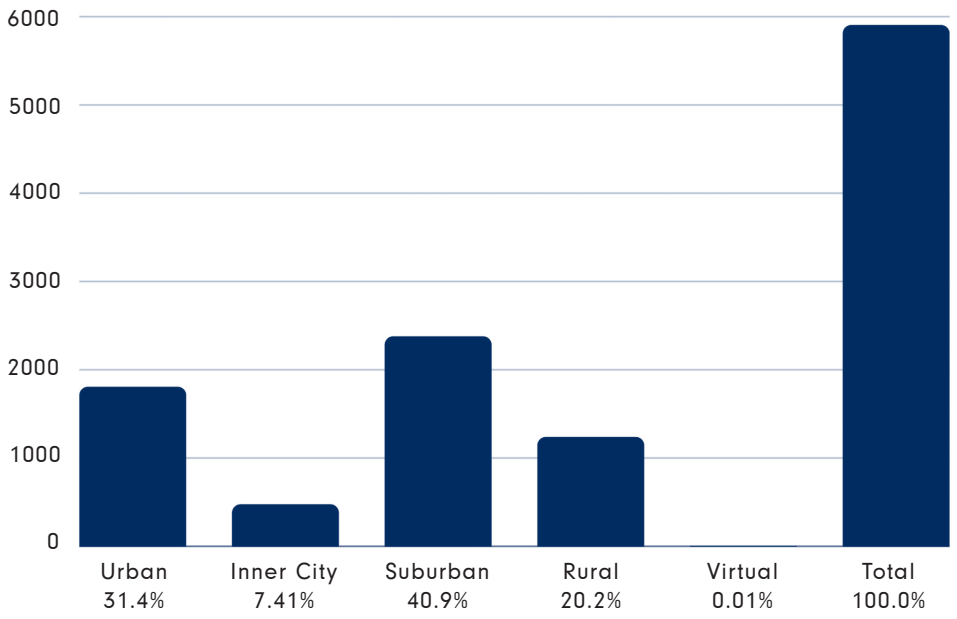
National Totals



Types of Schools

Catholic school typologies are determined by the source of their sponsorship. There are four classifications of Catholic schools:

Parish: sponsored by a single parish church community
Inter-parish: sponsored by two or more parishes
Diocesan: sponsored by the arch/diocese
Private: sponsored by a religious order or a private corporation

Exhibit 11 indicates that most elementary schools are parish-sponsored; however, the growth in the number and percentage of elementary diocesan schools has risen from 2.3% in 1990 to 19.8% in 2024, reflecting the reorganization of schools within dioceses. At the secondary level, sponsorship has remained fairly constant: private (44.6%) and diocesan (39.9%).

EXHIBIT 11: SCHOOLS BY TYPES OF GOVERNANCE

	Elementary/Middle		Secondary	
	Number	**%**	**Number**	**%**
Parish	2,884	61.6	95	8.1

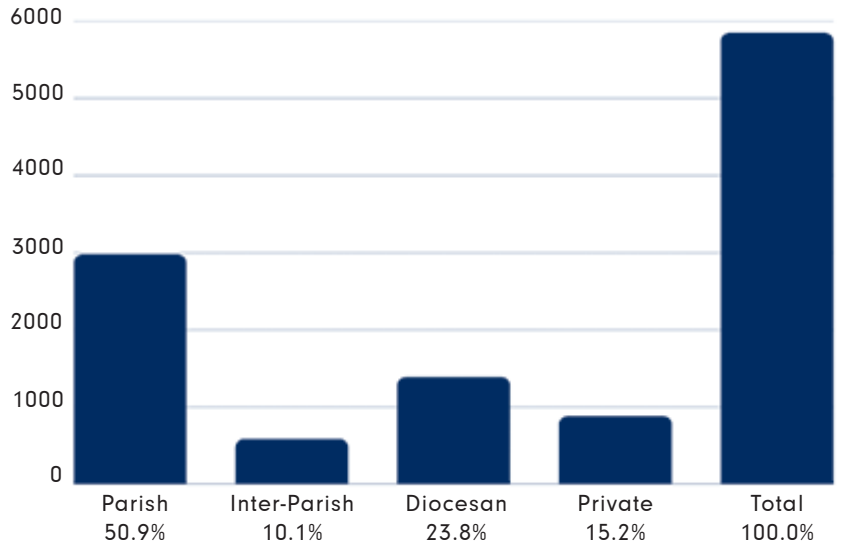
All Schools



School Boards/Commissions/Councils

Over the past three decades, schools have continued to establish boards, councils or commissions to assist with school governance. Since 1994, when data were first collected, the percentage of schools with boards has increased from 14.3% to a current level of 85.8%.

In 2022-2023, NCEA collected school boards by type for the first time. There are four classifications of Catholic school boards:

> **Advisory:** recommends policy to another entity who makes final decisions (such as a pastor), who can seek the board's advice at their discretion
>
> **Consultative:** like an advisory board, recommends and give advice; however, the entity with final authority is required to consult with this type of board before making decisions
>
> **Limited Jurisdiction:** authority to make final decisions relating to a limited set of issues
>
> **Full Authority:** complete governing authority and does not share that authority with any other entity

Source: FADICA, INC. (2020).

The most common board type is advisory, present in 65.6% of schools, followed by limited jurisdiction boards at 12.1%.

At the elementary/middle school level, 83.2% of schools have a board compared to 96.2% at the secondary level. Advisory boards are the predominant type at the elementary/middle school level by a wide margin (72.0%). While advisory boards are also the most common at the secondary level, the margin is narrower (43.1%).

Single Gender Schools

The 2024-2025 data show that 1.5% of Catholic elementary schools and 27.1% of secondary schools are single gender. Overall, single gender schools make up 6.6% of all Catholic schools in 2024-2025. This distribution has remained stable over the past decade, ranging from 6.5% to 6.7% since the 2014-2015 school year. Exhibit 13 illustrates this distribution.

Single Gender Secondary Schools

Male: 12.1% of secondary schools Female: 15.0% of secondary schools

School Openings and Consolidations/Closings

In the 2022-2023 school year, Catholic schools experienced the lowest number of closures in recent history. While closures have increased since then, the current trend remains consistent with the historical patterns of closures and consolidations in Catholic education over the past decade, as shown in Exhibit 20.

EXHIBIT 14: SCHOOL OPENINGS/CLOSINGS/CONSOLIDATIONS

School Enrollment

In this section, the data pertaining to enrollment in Catholic elementary and secondary schools are presented in several categories: grade levels, regional distributions, state and diocesan rankings and enrollment patterns.

Enrollment by Grade Level

In total, the 2024-2025 PK-12 enrollment is 1,683,506. Preschool students make up 10.1% of total enrollment. The K-12 enrollment is 1,513,173.

In the last decade, preschool enrollment has increased 8.9%, while enrollment at all other grade levels has declined by 15.1%.

EXHIBIT 15: ENROLLMENT BY GRADE LEVEL

	2014-2015		2019-2020		2024-2025	
Grade Level	**Students**	**%**	**Students**	**%**	**Students**	**%**

Ungraded	1,151	0.2	576	0.1	346	0.1
* Total 9 - 12	557,279	100.0	516,233	100.0	495,646	100.0
GRAND TOTAL	**1,939,574**	**100.0**	**1,738,445**	**100.0**	**1,683,506**	

** NB: Because some elementary schools have a ninth grade and some secondary schools have grades 5-8 in their totals, this distribution does not match that in Exhibits 16, 25 and 26.*

Preschool Enrollment by Age

	Number
Younger than 3 Years Old as of 9/1/23	10,276
Between 3 and 4 Years Old as of 9/1/23	57,447
Between 4 and 5 Years Old as of 9/1/23*	102,610
Total	**170,333**

**NB: Some dioceses did not break out preschool students by age. In those cases, all preschool children were included in the "Between 4 and 5 Years Old" category.*

The increasing trend of Pre-Kindergarten (PK) enrollment in Catholic schools, now constituting 10% of all enrollments and growing, highlights several important dynamics and opportunities within Catholic education. The increase in PK enrollment in Catholic schools signals a significant opportunity to engage families early, support children's holistic development and build a strong, vibrant community around Catholic education values. By responding strategically to this trend, Catholic schools can strengthen their mission and extend their impact on future generations. This trend is noteworthy for several reasons and can inform strategic actions by schools.

Enrollment by Region

National enrollment data, charted by region in Exhibit 16, show that the Great Lakes and West/Far West regions together enroll nearly half (44.7%) of the Catholic school population. Since last school year, enrollment declined in the New England (-2.1%), Mideast (-1.9%) and West/Far West (-1.4%) regions. The Great Lakes and Southeast regions remained stable with changes of 0.1% and 0.4% changes respectively, while the Plains region saw an increase of 1.1% in enrollment.

States with the Ten Highest School Enrollments

As detailed in Exhibit 17, 10 states accounted for 58.3% of Catholic school enrollment. California, New York, Ohio, Illinois and Pennsylvania (the top five) had 38.0% of total enrollment.

Florida (2.3%), Ohio (0.7%) and Missouri (0.6%) saw increases in enrollment compared to the 2023-2024 school year and Florida is the only state in this group that has seen an increase in enrollment (12.1%) compared to a decade ago.

Out of these 10 states with the highest enrollments, six of them have some sort of parental school choice program in their state, specifically the three states that saw increases in their enrollment in the past year.

EXHIBIT 17: STUDENT ENROLLMENT: STATES WITH THE TEN HIGHEST ENROLLMENTS

State	2014-2015	2019-2020	2024-2025
California	210,788	196,117	183,714
New York	175,677	145,858	121,174
Ohio	131,139	121,315	120,066

Percent	**60.9%**	**59.9%**	**58.3%**

Dioceses with the Twenty Largest Enrollments

The 20 largest dioceses serve 41.7% of the total enrollment in Catholic elementary and secondary schools, as illustrated in Exhibit 18. Many dioceses are larger than the metropolitan area of their title, but most of the enrollment comes from the metropolitan area and its surrounding suburbs.

Miami, Cincinnati and Cleveland have seen notable increases in enrollment from the 2023-2024 school year, 2.0%, 2.5% and 2.4% respectively. Miami has also experienced a notable increase (6.6%) in enrollment in the last decade. Additionally, Milwaukee and Washington, DC, have also seen slight increases in enrollment in the last year, 0.8% and 0.7% respectively.

Eleven of these 20 dioceses reside in places with parental school choice programs, specifically the five dioceses that saw enrollment increases in the last year.

EXHIBIT 18: STUDENT ENROLLMENT: DIOCESES WITH THE TWENTY LARGEST ENROLLMENTS

12,000-23,999	29	16.5%
24,000 - 43,999	12	6.8%
44,000-70,000	4	2.3%

National Catholic School Trend Data

U. S. Catholic school enrollment reached its peak during the early 1960s when there were more than 5.2 million students in almost 13,000 schools across the nation. The 1970s and 1980s saw a steep decline in both the number of schools and students. By 1990, there were approximately 2.5 million students in 8,719 schools. From the mid-1990s through 2000, there was a steady enrollment increase (1.3%) despite continued closings of schools.

In the last 10 years, 925 schools were reported closed or consolidated (14.2%), while 168 school openings were reported. Due to different definitions used by dioceses for consolidations, closings and their transitions into new configurations, along with actual new schools opened, the actual decrease in number of schools since 2014-2015 is 716 (11.0%). The number of students declined by 256,068 (13.2%). The most seriously impacted have been elementary schools.

Enrollment across the country has slightly declined this year. In the 2024-2025 school year, 104 dioceses' enrollment remained steady or increased from the 2023-2024 school year.

Exhibit 20 details the reported school closures. While the reported closures in the 12 large urban areas of the country are 310 over the past decade, the actual decrease in number of schools in those dioceses since 2014-2015 is 299 schools (16.8%). This is due to the same reasons stated above for the overall numbers.
There has been some good news as well during the last decade as 168 new schools opened in all parts of the country as shown in Exhibit 21.

Exhibit 22 presents the national and elementary enrollment trend data. Since 2015, elementary school enrollment has declined by 23.4% in the 12 urban dioceses and 13.3% in the rest of the U.S.

(The 12 urban dioceses for this purpose are: Chicago, Philadelphia, New York, Los Angeles, Brooklyn, Cleveland, St. Louis, Newark, Boston, Cincinnati, New Orleans, Detroit)

Schools with Waiting Lists

Exhibit 23 shows 39.3% of the schools place students on waiting lists for admissions, with 43.5% of elementary schools having waiting lists and 22.2% of secondary schools. Over the past five years, the percentage of schools with waiting lists has been in the 38%-40% range.

DIOCESAN EDUCATION OFFICE STRUCTURES AND PERSONNEL

Each diocese determines its own organizational structure regarding the administration of Catholic educational ministries in school and catechetical programs. Although variations in titles occur across dioceses, the three general categories of administrative leadership are these:

- **Vicar for Education** or **Secretary for Education**: Member of the diocesan staff who serves as the representative of the bishop in the coordination of the educational ministries of the diocese.
- **Superintendent of Schools**: Member of the diocesan staff responsible for the educational ministry of the diocese as it is exercised in the Catholic schools.
- **Diocesan Director of Religious Education**: Member of the diocesan staff responsible for promoting the catechetical ministry in the diocese as it is exercised in its parish programs and schools.

Dioceses had a retention rate of 70.5% for superintendents between fall 2023 and fall 2024. The retention rate of superintendents between fall 2022 and fall 2023 was 73.4%.

The figures below present regional data on the personnel staffing of diocesan education offices. Many dioceses operate with minimal personnel: three have no dedicated education offices, 19 are staffed solely by a superintendent, and an additional 23 are staffed by a superintendent and one support person.

STUDENT CHARACTERISTICS

Student Racial and Ethnic Diversity

For 2024-2025, NCEA aligned its demographic reporting with new federal standards by implementing a combined race and ethnicity question. This marks the first time since 2011-2012—when the previous federal standards were adopted—that race and ethnicity have been presented together in a single exhibit. Additionally, a new 'Middle Eastern or North African' category was introduced, separating individuals previously classified within the White racial category.

With this transition in reporting, there is potential for underreporting in the Hispanic and Middle Eastern or North African categories as schools and dioceses adopt and implement these standards. Additionally, comparing trends in the White, Hispanic and Multiracial categories from 2011 to 2024 will be challenging due to the previous use of separate race and ethnicity questions. Efforts will be made to address these issues in future reporting.

When NCEA transitioned to separate race and ethnicity reporting questions in 2011-2012, the percentage of students reporting 'unknown' race increased by 25.7%. Since then, the 'unknown' racial category has consistently accounted for more than 6.0% of total enrollment in any given school year, compared to 1.1% in 2010-2011, the last year Hispanic was reported with other racial groups. This year, 4.5% of students were reported in the 'Unknown' race category.

Student diversity in Catholic schools has increased significantly in the past 40 years. When data were first collected, the Hispanic/Latino population was included with non-Whites as "minorities." In 1970, the diversity percentage was 10.8%, in 1980 it had increased to 19.4% and by 2010 was 29.8%. In 2024-2025, the racial diversity is 34.9%.

One diocese did not report their Hispanic/Latino population using the combined question, resulting in an additional 14,534 Hispanic/Latino students. This brings the total percentage of students reported as Hispanic/Latino to 15.4%.

Enrollment of Non-Catholics

Most Catholic school students are Catholic. However, non-Catholic student enrollment has increased from 2.7% in 1970 to 11.2% a decade later, and currently stands at 21.8%, as shown in Exhibit 26.

EXHIBIT 26: NON-CATHOLIC ENROLLMENT

Not Reported	108,204	6.4
Total	**1,683,506**	**100**

The increasing trend of non-Catholic student enrollment in Catholic schools, which currently stands at 22%, is a significant development with various implications for these institutions. This shift not only reflects the changing landscape of Catholic education but also presents opportunities and challenges that schools must navigate thoughtfully. The trend of increasing non-Catholic enrollment in Catholic schools underscores the need for these institutions to adapt and innovate in ways that uphold their Catholic identity while embracing diversity. By taking thoughtful action, Catholic schools can continue to offer a valuable and inclusive educational experience for all students.

STAFFING OF CATHOLIC SCHOOLS

In 2024-2025, the total, full-time equivalent (FTE) teaching staff in Catholic elementary/middle and secondary schools is 154,258.

The FTE represents the total of all the full-time professional staff and each of the part-time professional staff weighted as 0.333.

Lay personnel make up 94% of the faculty, while 2.7% are religious or clergy. An additional 3.3% were either not reported or categorized as unknown. Exhibit 27 presents the FTE data by category and percentage.

Exhibit 28 presents staff by position, showing that 69.7% are teachers or teacher assistants. Teacher assistants are more common in elementary/middle schools (14.9%) than in secondary schools (1.7%).

As shown in Exhibit 29, the nationwide retention rates are 84.0% for principals and 85.7% for teachers.

For the first time in 2024-2025, NCEA collected data on teachers who were new to their schools and first-year teachers, as presented in Exhibit 30. A total of 16,358 teachers were new to their schools, and 5,317 were in their first year of teaching.

Per pupil ratios are shown in Exhibit 31. In 2024-2025, the pupil/professional staff ratio in Catholic schools, based on FTE, was 10.9:1. By education level, the ratios were: elementary/middle schools at 11.6:1 and secondary schools at 9.6:1. Over the past decade, national pupil/professional staff ratios have remained relatively stable, ranging from approximately 11:1 to 13:1.

Racial, ethnic and religious background data regarding all of the professional staff were collected. Exhibit 33 details the numbers and percentages of the religious background of the professional staff members and Exhibit 34 provides the racial and ethnic profiles and percentages of the professional staff.

Total	**170,581**	**100.0**				

**Includes all full-time and part-time professional staff.*

**NB: Two dioceses did not report the religious background of their faculty.*

For the 2024-2025 academic year, NCEA aligned its demographic reporting with new federal standards by implementing a combined race and ethnicity question. Data shows that faculty in Catholic schools are less diverse than the student population. While 73.9% of faculty were reported as White, only 60.6% of students identified as White. Additionally, one diocese did not initially report Hispanic/Latino faculty under the combined question, accounting for an additional 176 faculty members. With this adjustment, Hispanic/Latino faculty represent a total of 9.7% of all Catholic school faculty.

With this transition in reporting, there is potential for underreporting in the Hispanic and Middle Eastern or North African categories as schools and dioceses adopt and implement these standards. Additionally, comparing trends in the White, Hispanic and Multiracial categories from 2011 to 2024 will be challenging due to the previous use of separate race and ethnicity questions. Efforts will be made to address these issues in future reporting.

Serving Students with Special Needs

As Catholic schools increasingly serve students with special needs, we have expanded this section of our report to include the number of schools supporting these students, along with a breakdown of specified disabilities.

For the 2024-2025 school year, 4,417 schools (75.5% of all schools) reported serving students with diagnosed disabilities. These include physical, emotional and learning disabilities that are accommodated in general education classrooms with or without special resource teachers.

Data collection indicates that 9.1% of students in Catholic schools have a diagnosed disability, an increase from 7.8% reported the previous year.

This year we added the specified disability categories of Attention-Deficit Hyperactivity Disorder (ADHD), Autism Spectrum Disorder, Specific Learning Disability, Intellectual or Developmental Disability, Physical Disability and Other. If a student had multiple diagnoses, they were reported in the category that covered their primary diagnosis. ADHD and Specific Learning Disability are the most commonly reported diagnoses among students in Catholic schools.

Total	**93,739**	**58,652**	**152,391**

**NB: Seven dioceses provided total numbers of diagnosed disabilities only, their data is included in the Specific Disability Not Reported category. Five dioceses provided no information.*

Title Services

NCEA's data collection on the number of participating students receiving remedial instruction through Title I of the Elementary and Secondary Education Act (ESEA), currently known as the Every Student Succeeds Act (ESSA), are presented in Exhibit 37; the number of participating schools in Titles I, II, III, and IV are presented in Exhibit 38.

The reported totals are lower than the actual figures due to incomplete data submissions from several dioceses with large numbers of participating students. These dioceses either did not supply the data or provided incomplete data that did not include all of their schools. Due to these inconsistencies in data reporting, comparisons to previous years are not included. A detailed listing by region and state is available in Appendix F.

EXHIBIT 37: STUDENTS RECEIVING TITLE I SERVICES

Region	Students
New England	7,429
Mideast	27,170
Great Lakes	24,256

Total	**3,424**	**4,128**	**1,591**	**3,547**

Federal Nutrition Programs

The 2024-2025 data collection reveals that many schools participate in the federal nutrition programs that provide free or reduced-price lunch to students whose family income level meets established criteria. The number of students receiving and eligible for such services is indicated in Exhibit 39. The totals are lower than actual because several of the dioceses with large numbers of participating students have not supplied these data or have provided an incomplete data set that does not include all of their schools. Four dioceses who have previously reported having students using these programs reported 0 this year. Due to inconsistencies in the reporting of this data, comparisons to previous years are not provided. A listing by region and state is found in Appendix F.

Thirty-four point five percent (34.5%) of schools reported having a free and reduced-price lunch program. Fourteen point seven percent (14.7%) of enrolled students were reported as eligible for the program.

EXHIBIT 39: PARTICIPATION IN FEDERAL NUTRITION PROGRAMS

Region	Schools that offer program	Students Receiving Services	Students Eligible for Services
New England	85	10,102	13,232
Mideast	295	44,481	60,102

West/Far West	168	22,863	42,855
Total	**2,021**	**185,027**	**248,128**

Parental Choice Programs

Thirty-two states and the District of Columbia provide children the option to attend the public or private school of their parents' choice through tax credit, voucher or scholarship. In 2024, school choice programs expanded in 15 states. 18.0% of Catholic school students utilize a parental choice program and 31.0% of schools enrolled students utilizing a parental choice program. A breakdown by region is presented in Exhibit 40.

The arch/dioceses in Ohio, Florida, Indiana, Oklahoma, Iowa and Arizona reported that over 50% of their students utilize parental choice programs. In Florida, 85.7% of students are utilizing parental choice programs, compared to 60.1% last year. In Ohio, 80.9% of students are utilizing parental choice programs, compared to 62.9% last year.

Total	**1,813**	**302,636**

**NB: Sixteen arch/dioceses that reside in states with school choice programs did not provide data about the use of parental choice programs. Given the inconsistencies in the reporting of this data, we do not provide comparisons to other years.*

E-Rate Program

Since 1998, schools were able to apply for discounted telecommunications services under a program known as the E-Rate. The number of schools that received E-Rate discounts in the last school year is included in Exhibit 41. Not all schools or dioceses provided this information. Due to inconsistencies in the reporting of this data, comparisons to previous years are not included. A listing by region and state is found in Appendix F.

International Baccalaureate and Dual-Language Immersion Programs

The International Baccalaureate® (IB) offers a continuum of international education through four challenging, high quality educational programs to students aged three to 19. Dual-language immersion programs provide both native English speakers and English learners with general academic instruction in two languages and can be offered from kindergarten onward.

**NB: Not all schools or dioceses provide this information. Given the inconsistencies in the reporting of this data, we do not provide comparisons to other years.*

Educational Models

In response to the evolving landscape of education, specifically Catholic education, NCEA expanded its 2024-2025 survey of Catholic schools to include questions about emerging educational models, such as microschools and classical schools.

Microschools

A microschool is a small, sustainable Catholic school with a student population smaller than that of neighboring schools. Typically serving fewer than 150 students, microschools aim to remain financially viable while offering a high-quality education. They can be adapted to different educational philosophies, such as personalized learning, and foster strong relationships between teachers and students. In the 2024-2025 academic year, approximately 22 Catholic microschools are operating in the United States.

New England	0
Mideast	1
Great Lakes	3
Plains	2
Southeast	2
West/Far West	14
Total	**22**

**NB: Not all schools or dioceses provide this information.*

Classical Schools

A classical school is defined as a Catholic school rooted in traditional liberal arts education. The curriculum in classical schools is often based on trivium (grammar, logic, rhetoric) and quadrivium (arithmetic, geometry, music, astronomy). It has been a growing movement in the United States over the past five years. A prominent example of these schools in Catholic education is the Chesterton Schools Network which was started in 2007. In 2024-2025, there are approximately 173 operating Catholic classical schools.
